

### **Senior Formulation Scientist (Drug Product)**

**Location:** Rockville, MD [100% on-site]

**Type:** Full-Time

On Demand Pharmaceuticals (ODP) is changing the way we make and distribute medicines—by providing them to anyone, anywhere, any time. ODP is creating innovative manufacturing platforms to enable our vision to produce critical medicines at the point of care and to secure the pharmaceuticals supply chain. As a young organization, ODP offers an exciting opportunity for passionate scientists and engineers to make a difference in the world while developing career paths for advancement. ODP is seeking a Formulation Scientist to support the development of our next generation medicine manufacturing platforms. Our manufacturing platform is comprised of modules that can chemically synthesize active pharmaceutical ingredients, purify crude products, and formulate these into finished drug product. These modules are miniaturized and mobile and can be deployed anywhere in the world to strengthen pharmaceutical supply chain and enable local production of medicines.

#### **Responsibilities:**

- Design and develop formulations and processes for various compounds, including for oral dosage forms and sterile injectables.
- Work with ODP's scientists and engineers to enable innovative approaches for formulation, fill/finish and packaging to produce FDA-approved drugs.
- Work on the development and translation of new drugs onto the next generation of "Pharmacy on Demand" manufacturing platforms that can produce FDA-approved drugs
- Participate in project management and product development strategies, including leading technical, legal, and regulatory aspects of formulation and process development activities.
- Author and review CMC reports i.e. documentation for research and documentation for regulatory filings.
- Maintain ODP's leading edge by keeping up to date on regulatory guidelines, technical innovations, and new developments within the pharmaceutical industry.
- Deliver results in a high paced environment.
- Analysis and characterize processes and products using a wide range of analytical tools.

#### **Minimum Hiring Standards:**

- Masters or Ph.D. in chemical engineering, pharmaceutical sciences, materials engineering, or related discipline and 2 years (with PhD) or 5 years (with MS)
- Experience with oral, parenteral, or other dosage form formulation development, process optimization, and scale up.
- Experience with industrial and innovative processes and technologies, including downstream processes such as fill/finish and packaging.
- In-depth knowledge in pharmaceutical product development, CMC regulatory requirements, project management, and data and statistical analysis.
- Strong management and interpersonal skills.
- Ability to work collaboratively with multi-disciplinary cross-functional research teams.
- Strong written/oral skills required, and ability to communicate technical concepts to a non-technical audience.
- Working knowledge of quality-by-design principles
- Energy and passion to thrive in a start-up environment and to deliver on the mission of On Demand Pharmaceuticals.

**Preferred Qualifications:**

- Candidates with experience in continuous processing of chemicals, materials, or pharmaceuticals
- Candidates that have a working knowledge of GXP

**Physical Demands/Work Environment:**

- Ability to safely handle hazardous materials
- Ability to move 50 pounds
- Ability to bend to reach floor level
- Ability to wear respirator

**COVID-19 Vaccination Policy:** With limited exceptions, up to date COVID-19 vaccinations are required for all ODP employees who work on-site at our headquarters. Employees must present proof of full vaccination (ex. CDC card) or submit exemption requests to the Director of People Operations before their start date. Exceptions to the policy are available only for those who need an accommodation for a qualifying medical reason or sincerely held religious belief or practice.
