

Director, Point of Care Pharmacy Services

Location: 90% on-site requirement

Type: Full-time

On Demand Pharmaceuticals (ODP) (www.ondemandpharma.com) is changing the way we make and distribute medicines—by providing them to anyone, anywhere, anytime. We are creating innovative manufacturing platforms and systems to enable our vision to produce critical medicines at the point of care and to secure the pharmaceutical supply chain. As a young organization, ODP offers an exciting opportunity for passionate professionals to make a difference in the world while developing career paths for advancement.

Role Summary:

Working with the Chief Medical Officer, the Director for Point of Care Pharmacy Services will help develop and execute ODPs strategic plan for incorporating sterile compounding as part of our point of care solution to drug shortages, disaster response, and supply chain challenges. The Director will be responsible for implementing and executing innovative, high-quality, and scalable sterile compounding operations consistent with organizations strategic plans.

Responsibilities:

- Works with the Chief Medical Officer and cross-functional teams to develop and implement our point of care production strategy
- Working with the research, development, and analytical science teams, optimizes and evolves ODPs portfolio of compounded products and services
- Develops and implements state-of-the art compounding quality systems and compliance mechanisms
- Oversees day-to-day operations to ensure an optimal state of control via systems and the monitoring of key performance indicators
- Establishes policies and procedures, systemizes and optimizes workflows for distributed production
- Hires, trains, develops, and ensures competency of a team to support our distributed production approach upon deployment
- Serves as liaison between ODP, state boards of pharmacy, and FDA
- Ensures compliance with USP 795/797/800, specific state boards of pharmacy rules and regulations
- Is familiar with good manufacturing practices and the current FDA guidance on compounding (503a and 503b), including the insanitary conditions guidance.

Minimum Qualifications:

- Pharmacy degree (BS and/or PharmD) from an ACPE-accredited college of pharmacy required.
- Minimum of 5 years' experience managing sterile compounding operations and/or quality systems in a hospital or health system (residency training will be considered in lieu of years of experience).
- Experience supervising a small staff and developing a team approach.
- Experience implementing automated and semi-automated compounding processes.
- Ability to work in fast-paced, entrepreneurial settings, in diverse, cross-functional teams.
- Strong communications skills, orally, in writing and in presentations.
- Strong project management skills.
- Innovative, forward-thinking mindset and problem-solving approach.

Preferred Qualifications:

- Specialized residency training preferred (e.g., HSPA, Medication Use Safety & Policy).

- Board certification in sterile compounding or equivalent certification/training
- Knowledge of Human Factors Engineering and Lean Six Sigma
