

HIGH QUALITY MEDICINES AS A SERVICE

Introducing Point-of-Care 503a and 503b medicine production to take control of your drug supply and the ability to provide optimal patient care.

Formulary, Sourcing & API Manufacturing:

On Demand Pharmaceuticals can offer dedicated 503a and 503b compounding capabilities AT your hospital, including a customizable formulary of medicines and dosage forms. This enables a more agile and transparent supply chain, predictable pricing and reduced drug shortages.

Pioneering Solutions for Drug Shortages, Creating A New Approach to Medicine Production

Our Services

503A Shortage Response Capability

- ✓ Agile non-sterile to sterile anticipatory compounding capabilities to meet a wide variety of injectable drug shortage needs
- ✓ Standardized, software-driven processes that start from pre-packaged raw materials from vetted cGMP/quality sources
- ✓ Deployable over software
- ✓ Access to expanded formulary updates
- ✓ Terminal sterilization and extended BUD testing available
- ✓ Meets or exceeds all **USP 797** requirements

Turnkey 503B Health System Capabilities
